PROFILE

Fresh Computer Science graduate (Multimedia Computing) with full-stack web development experience, from backend systems in Laravel and MySQL to responsive front-end interfaces, alongside creative media production and 3D/VR development in Unity. Builds complete, tested applications end-to-end, from database design through UI/UX and deployment.

EDUCATION

Universiti Teknologi MARA (UiTM) Cawangan Melaka, Kampus Jasin Oct. 2022 - Mar. 2026

Bachelor of Computer Science (Hons.) Multimedia Computing | CGPA: 3.65

Relevant Coursework: *Database Design and Development, Object-Oriented Programming, Discrete Structures, Principles of Operating Systems, Data Structures, Image Processing, Software Engineering - Theories and Principles, Enterprise Programming, Artificial Intelligence Algorithms, and Virtual Reality.*

Universiti Teknologi MARA (UiTM) Cawangan Selangor, Kampus Dengkil Aug. 2021 - Jun. 2022

Foundation in Engineering | CGPA: 3.63

SMK USJ 12, Subang Jaya, Selangor 2020

Malaysian Certificate of Education | 8A 1B

EXPERIENCE

Web Development & Multimedia Intern Sept. 2025 - Feb. 2026

JustSimple Digital Sdn Bhd Petaling Jaya, Selangor

- Built and optimized responsive commercial websites in WordPress/Elementor, adding multilingual localization and restructuring legacy content to improve UX and visual consistency.
- Led end-to-end video production for commercial campaigns such as trend research, storyboarding, filming, and post-production editing in CapCut and Adobe Premiere Pro.
- Designed social media assets and executed digital marketing campaigns, applying data-driven strategies from professional agency training.

PROJECTS

Theatre MBA: Cinema Ticketing System(Personal Project) | Laravel, PHP, MySQL, Tailwind CSS 2026

- Rebuilt a legacy PHP ticketing system as a full-stack Laravel application with an 8-table relational schema, role-based admin panel, and sales reporting with CSV export.
- Solved concurrent double-booking using database transactions with row-level locking, backed by a unique database constraint as a second layer of protection against race conditions.
- Validated reliability with 70 automated PHPUnit tests covering booking logic, access control, and edge cases such as age-restricted content and cancellation windows.

KL Reimagined: A Virtual Journey | *Unity, C#, 3D Modelling* 2025

- Developed an immersive VR tour of Kuala Lumpur landmarks in Unity, deployed on Meta Quest 3, with multiple locomotion options (teleportation, joystick movement, and waypoint-based navigation) to accommodate different user comfort levels.
- Optimized 3D models of the Petronas Twin Towers, KL Tower, and Muzium Negara through iterative remodeling and proximity-based activation, reducing rendering load to sustain performance on standalone VR hardware.
- Designed interactive info panels and spatial audio triggered during in-experience mini-tasks, adding contextual information and immersive feedback throughout the tour.

Healthy vs Unhealthy: Behaviour-Based Health Predictor | Python, scikit-learn, pandas 2025

- Built a machine learning classifier that predicts whether a person is healthy or unhealthy from 12 daily lifestyle habits, trained on 500 bilingual survey responses and reaching 92% accuracy on unseen data.
- Compared seven algorithms with stratified 10-fold cross-validation and tuned a Random Forest across 72 hyperparameter combinations, splitting the data before training to prevent leakage into the test set.
- Deployed it as an interactive Streamlit web app with a guided input form and confidence scores, backed by a pandas pipeline that cleans and encodes survey answers.

INVOLVEMENTS

Participant (National Level) & Top 4 Finalist (UiTM Jasin), Top Coder | Python 2024

- Competed in a nationwide Python programming competition and Qualified for the National Level championship after securing a Top 4 Finalist position at the university level (UiTM Melaka).

Vice President, Multimedia Computing Society 2023 - 2024

- Directed comprehensive student development initiatives, including a Game Creation Workshop and a Mentor-Mentee Program, effectively fostering peer learning and technical skill enhancement among students.
- Orchestrated large-scale community events such as the MMCS Family Day, while overseeing revenue-generating operations including food booths and the production of official society merchandise.

SKILLS

- **Languages:** C, C++, C#, Java, JavaScript, PHP, Python, CSS3, HTML5
- **Frameworks & Libraries:** Laravel, React, NumPy, Pandas, scikit-learn
- **Development Tools:** Android Studio, Eclipse, Visual Studio, VS Code, MATLAB, Anaconda, Git, WordPress, Elementor
- **Design Tools:** Figma, Canva, Photoshop, Illustrator,Premiere Pro, Lightroom, Affinity, CapCut, Adobe Animate
- **3D Modelling & Game Dev:** Blender, Autodesk 3ds Max, Unity, Construct 3, Roblox Studio
